

ADVANCE INFORMATION: AE108

The AE108 is a new, compact, yet extremely powerful active subwoofer with remote control for easy set-up and adjustability.

Designed to work seamlessly as part of a multi channel system including the new AE100's, AE109's and AE107, the AE108 is ideal for the modern home where controlled bass performance is required without compromising the living space.

At less than one cubic foot in size, the AE108 can be positioned discretely and adjusted with the supplied remote control to achieve the ideal audio balance from the listening position. Finished in a choice of satin black or walnut vinyl veneer finishes, the AE108 delivers a bass punch that belies its compact size.
