

ADVANCED INFORMATION AE300²

ACOUSTIC ENERGY
for the love of music

The AE300² is an all-new compact stand-mount loudspeaker suitable for small to medium sized rooms. Featuring new cabinet design and drivers, performance has been considerably improved in all areas whilst maintaining the same competitive pricing as the previous model.

The AE300² utilises brand-new paper/coconut-fibre bass/mid drivers which were developed using research from the CORINIUM project. These drivers, along with an all new soft dome tweeter are housed in an inert, slimline 18mm constrained-layer RSC™ MDF/bitumen cabinet - offering a significant step up in both audio and material quality at this price point. The slot shaped duct port on the rear of the speaker augments the bass output and has been carefully developed to reduce the effect of air turbulence with a clean, undistorted bass performance.

The cabinet is available in a choice of walnut or newly developed 'silk touch' matte black or white finishes with screen-printed logos and trims and grilles which are colour matched for each finish. The new AE300² will easily integrate within any home décor when placed on speaker stands or bookshelves.

The new AE300² is an audio product with clean, uncluttered lines, delivering the thrilling and powerful presentation which discerning Acoustic Energy owners have come to expect for over 35 years.

AE300² Specifications

- **Drive Unit:** 130mm paper cone
- **Tweeter:** 29mm fabric dome
- **Frequency Range:** 42Hz - 29kHz
- **Sensitivity:** 86dB
- **Peak SPL:** 112dB
- **Power Handling:** 120w
- **Crossover Frequency:** 3.5kHz
- **Impedance:** 6ohms
- **Design:** 2 way
- **Grilles:** Slim, cloth magnetic fit
- **Dimensions:** 320 x 170 x 270 (mm, HxWxD)
- **Weight:** 7kg (each)
- **Finishes:** Walnut, Matte Black or Matte White
